

## **BENTO-STREU**

### Clumping cat litter made of bentonite

# Clumping cat litter made of bentonite. High absorbability (450 %) and clumps effectively.

- Fine, clumping cat litter made of bentonite
- 450 % absorbability
- Low-dust
- With lavender scent
- Gentle on cat paws
- Can be used sparingly thanks to effective clumping
- Effectively traps odours due to high absorbability
- The litter does not stick to the cat's paws thanks to a special grinding process

Bentonite is a purely natural product and therefore completely safe for your cat.

#### **Application**

The clumps can be removed from the litter tray with a litter shovel and disposed of in the domestic waste. The litter tray simply needs to be refilled with Bento-Litter. The rest of the waste in the tray can be disposed of in compost. Please observe local regulations.

#### **Anifit tip**

Provide one litter tray for each cat where possible. Cats use their litter trays more carefully when they are not forced to share with other cats.

#### **Familiarisation**

If the cat unexpectedly does not immediately take to using the new litter, simply combine this with some of the old litter and reduce this amount on a day by day basis.

#### Other accessories

With the Anifit cat litter shovel, the clumps can be effortlessly and cleanly removed and disposed of.

#### **Product information**

7kg pouch
